WELCOME TO COOSA COUNTY HIPPY!

We are always excited to share with others our mission of providing research based curriculum to parents and their youngsters through home education and group events.

HIPPY is a parent involvement and school readiness program, with a goal of encouraging school readiness and support to parents as they become their child's first teacher. The model is designed to increase the parent's confidence in their ability to prepare their children for school. The Home Instruction for Parents of Preschool Youngsters Program (HIPPY) offers free home-based early childhood education for 3,4, and 5 year olds by providing the parents with a set of developmentally appropriate materials, curriculum and book designed to strengthen their children's cognitive skills, early literacy skills, social/emotional and physical development.
