

# PACT

Our goal for the Parents as Teachers program at Parents and Children Together (PACT) is to help build stronger families in an effort to keep children safe. The five protective factors are incorporated in all aspects of our program. We help facilitate friendships and support during home visits and through our group connections. The information we share with families helps to strengthen parenting knowledge and links them to services and opportunities that will aid in the social and emotional development of their children. After three years in this program, the families are truly developing connections with each other and PACT staff.
